

CUT DRUG PRICES. NOT 340B.

We all agree that the high price of prescription drugs needs to be addressed.

However, weakening one of the most effective programs in health care will not help.

At no cost to taxpayers, the 340B program is critical to the health of our patients because it allows hospitals serving vulnerable communities to address the health care needs of their communities, including providing free or substantially discounted prescriptions to low-income and rural patients, operating free clinics, treating patients with substance use disorders, and sustaining access to other lifesaving services for patients.

Weakening this vital program will hurt our patients. Please keep 340B strong.

With our thanks
